ACHIEVEMENTS

Cost reduction

Modal|XP: Project to create a Bureau centralizer.
Savings of approximately BRL 500,000 per year by streamlining the process of external API calls.
With the centralization of calls, the same query did not need to be made more than once to the original source, as the result was already cached in the company's database.

Performance improvement

Toro Investimentos: Process automation for the fixed-income trading desk team.
Modernization of tools to automate the process of verifying information on fixed-income securities. The innovation generated average savings of over BRL 30,000 per year per user and 400 hours of work per year per employee.
